September 2017
– April 2018
Toronto, ON

WordPress and React Developer | Elephant Space

- Developed and setup REST API Routes for use within the WordPress and React environments
- Adjusted several designs to Elephant Space's website in order to improve visual appeal and feel
- Developed as part of a team to create a not-yet-released React Application within the WordPress site
- Coordinated the main designs of Elephant Space's React Application
- Developed the basic/template layouts of Elephant Space's React Application components to be as modular as possible for ease of development for the team.
- Co-developed a donation system which would allow users to login to Facebook to display their names and donation amount or to remain anonymous on the donation wall.
- Developed the design of the donation wall, as well as improved the layout of Elephant Space's Donation page
- Participated in several developments that aimed to improve the team's development cycle within the back-end.

June 2018
– July 2018
Toronto, ON

Web Designer & Developer / Receptionist
Parkdale Golden Age Foundation

- Created a site dashboard to add more functionality and ease-of-management to the organisation's site.
- Created an upload API back-end, using PHP as the development language
- Created an email API back-end for their front-end page contact forms as the default provided email system gave out a spam-like email, using PHP as the development language
- Updated contact form designs on the front-end
- Created a paper form for organisation memberships
- Improved upon the previous year's website design and layout to assure that designs are more superfluous and seamless
